

# From Prevailing to Pioneering:

## Current and Emerging Biomarkers in Neurodegenerative Lysosomal Diseases

Wednesday, February 7, 2024 • 5:15 - 6:15 PM PST

Grand Hall C/D in lobby level of Manchester Grand Hyatt San Diego

**Maurizio Scarpa, MD, PhD**

Regional Coordinating Centre for Rare Diseases, University Hospital, Udine, Italy

**Maria Fuller, PhD**

University of Adelaide, Adelaide, Australia

**Henrik Zetterberg, MD, PhD**

University of Gothenburg, Gothenburg, Sweden

### Symposium Summary:

The field of neurodegenerative lysosomal diseases is evolving. The underlying pathophysiology continues to be elucidated, although the ability to quantify disease burden and progression remains limited. This symposium aims to discuss the laboratory biomarkers in lysosomal diseases currently used in clinical research and practice, highlight biomarkers that are indicative of the underlying pathophysiology, and introduce novel biomarkers currently being investigated to further characterize neurodegeneration.

The speaker panel comprises leaders in their field: Professors Maurizio Scarpa, Maria Fuller, and Henrik Zetterberg. Each faculty member will provide their perspectives on the use of current and emerging biomarkers in lysosomal diseases from bench to bedside. The event will close with a Q&A session to provide audience members the opportunity to interact with the panel members.
